

AYMEN GHRIS

Full-Stack Software Engineer — React · Next.js · TypeScript

Annaba, Algeria | aymenghris@outlook.com | +213 699 786 654 | github.com/aymenghris | linkedin.com/in/aymenghris | aymenghris.vercel.app

PROFILE

Web developer specializing in React, Next.js, and TypeScript. Self-taught through 6 independently built projects covering full-stack apps, API integration, authentication, and responsive UI. Comfortable with the modern React ecosystem and eager to bring that hands-on experience to a first professional role.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React, Next.js (App Router), Redux/Zustand, Tailwind CSS, Framer Motion

Backend & Data: Node.js, REST APIs, Drizzle, MongoDB, PostgreSQL

Tools: Git/GitHub, Vercel, Postman, Figma, VS Code, npm/pnpm

Concepts: SSR/SSG/ISR, JWT auth, responsive design, component architecture, Git workflow

PROJECTS

Motion — *Next.js, TypeScript, Convex, Zustand, Tailwind*

- Notion-style workspace: rich-text block editor with nested documents for flexible organization.
- Real-time and file management: instant cross-device synchronization with integrated file and image storage.
- Secure and responsive: authentication, protected routes, and a fully responsive experience across devices.

<https://github.com/aymenghris/motion-app>

Lingo — *Next.js, TypeScript, Zod, Drizzle, Clerk, Stripe*

- Gamified language learning: multiple language courses with interactive lessons, challenges, xp, hearts, daily quests, and sound effects.
- Rewards and subscriptions: In-app shop for hearts and upgrades, with secure Stripe subscriptions offering premium features like unlimited hearts.

Docs — *Next.js, TypeScript, TipTap, Zustand, Shadcn/ui*

- Real-time collaboration: simultaneously edit documents with live cursors, avatars, and instant synchronization.
- Document management: create documents from templates and easily search, rename, delete through your workspace.

<https://github.com/aymenghris/docs-app>

Portfolio — *React, TypeScript, Tailwind, GSAP*

- Smooth and dynamic UI: lenis-powered scrolling, scroll-spy navigation, and GSAP reveal animations for a fluid experience.
- Modern portfolio: responsive dark-mode design, projects with interactive tags, live demos, repository links.
